Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fail to teach or suggest individually or in combination a method and a system for copying a portrait-oriented graphic in a system memory to a landscape-oriented frame buffer for portrait-oriented display on a default landscape-oriented display device; wherein each independent claim identifies the uniquely distinct features: "loading into an L2 cache a plurality of blocks of pixels (a band); wherein the blocks of pixels are processed into sub-columns of pixels, and writing said sub-columns of pixels to a frame buffer via a write combine cache" (as per claims 1, 9, 17, 25 and 28). These distinct features of the present claims invention have not found to be anticipated, suggested or made obvious by the prior art of record, either singularly or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pentkovski et al (US Patent No. 6,356,270) taught an efficient utilization of write combining buffers.

Kuriakin et al (US Pub. No. 2003/0151610) taught a method and apparatus for memory management of video images.

Balatsos et al (US Patent No. 6,072,507) taught a method and apparatus for mapping a linear address to a tiled address.

Joshi et al et al (US Patent No. 5,630,075) taught a write combining buffer for sequentially addressed partial line operations originating from a single instruction.
